# FOREWORD

The Uganda Bureau of Statistics (UBOS) is committed to the production and dissemination of integrated statistical information that meet the National and International standards quality requirements. Specifically, indicators are required for monitoring the progress towards achieving the goals for the National Development Plan II, 2015/16-2019/20 and the United Nations (UN) Sustainable Development Goals (SDGs). This Statistical Abstract is UBOS's prime annual publication through which key statistical information derived from the latest surveys, censuses and administrative records of Ministries, Departments and Agencies (MDAs) are disseminated for use in tracking outcomes of policies as well as decision-making.

The information presented in the 2018 Statistical Abstract covers statistics on the Environmental, Demographic, Socio-economic, Production and Macroeconomic sectors. Information on these sectors is presented basing on either a Calendar Year (January-December) or Financial Year (July-June) structure, depending on availability of data.

The Bureau would like to appreciate the continued cooperation of MDAs and Local Governments in providing the requisite data to produce this publication. In a special way, I wish to thank the 2018 Statistical Abstract Committee that compiled this publication. The Bureau welcomes constructive comments from stakeholders that aim at enhancing the quality of its future publications.

Copies of this publication are available at the Bureau's Head Office located at Statistics House, Plot 9, Colville Street, Kampala and the official UBOS website: [www.ubos.org](http://www.ubos.org).

It is my sincere hope that the statistical information in this publication will be used by the readers to make informed decisions.
